Allodya Q.

Try Taleka!

Executive Summary

Key Issues

Language disappears every **2 weeks** globally

Less than 5% of the world's languages have digital representation

Indigenous speakers rely solely on fragile **oral traditions**

People don't even realize the language is **disappearing**

Question

How do we **save indigenous languages** that's silently dying before anyone notices it's **gone**?

Solution

Taleka

A digital sanctuary where elders share **stories**, learners explore **culture**, and languages **grow again**.

Cultural Impact

Blueprint for endangered languages

Elders and youth **reconnected** through platform

Languages preserved before last speakers **gone**

As digital technology continues to expand, indigenous languages in ASEAN are left behind...

Let's take a look at
ASEAN countries...

1

ASEAN is home to...

>1,200
languages

Source: Ethnologue

However,
more
than...

40%

Source: UNESCO

DANGER!

of languages
are
endangered.

The rapid expansion of digital technology
often **ignores** indigenous voices...

Digital growth silences indigenous voices

2

In Malaysia, there's a perfect example of this problem...

Semai Language

From **Peninsular Malaysia**

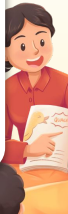

Spoken by **±60.000** Orang Asli

Transmitted through **Oral Traditions**

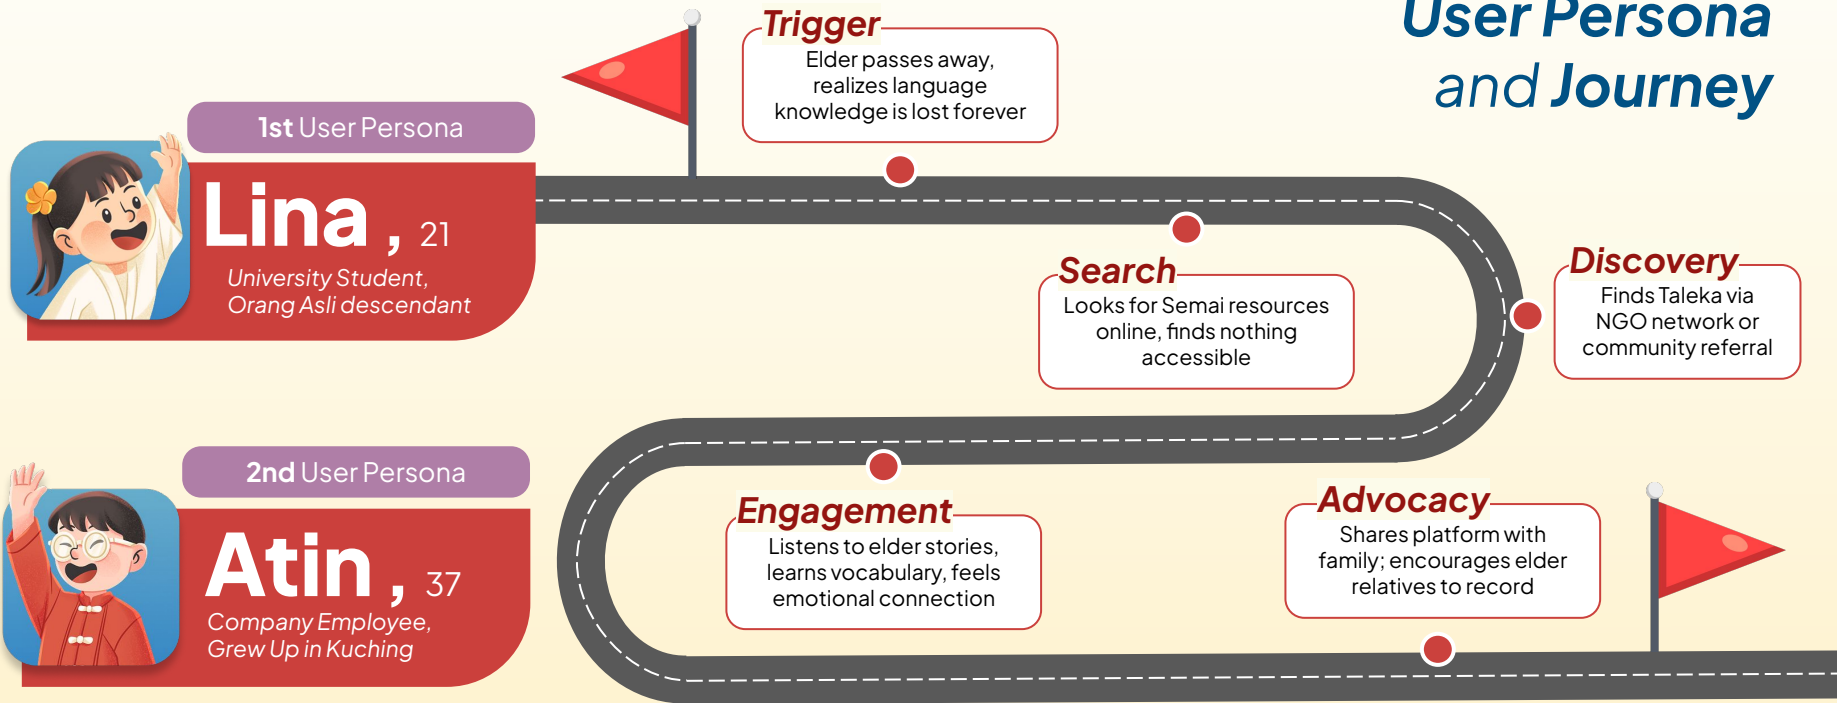

The communities are shifting to
dominant languages

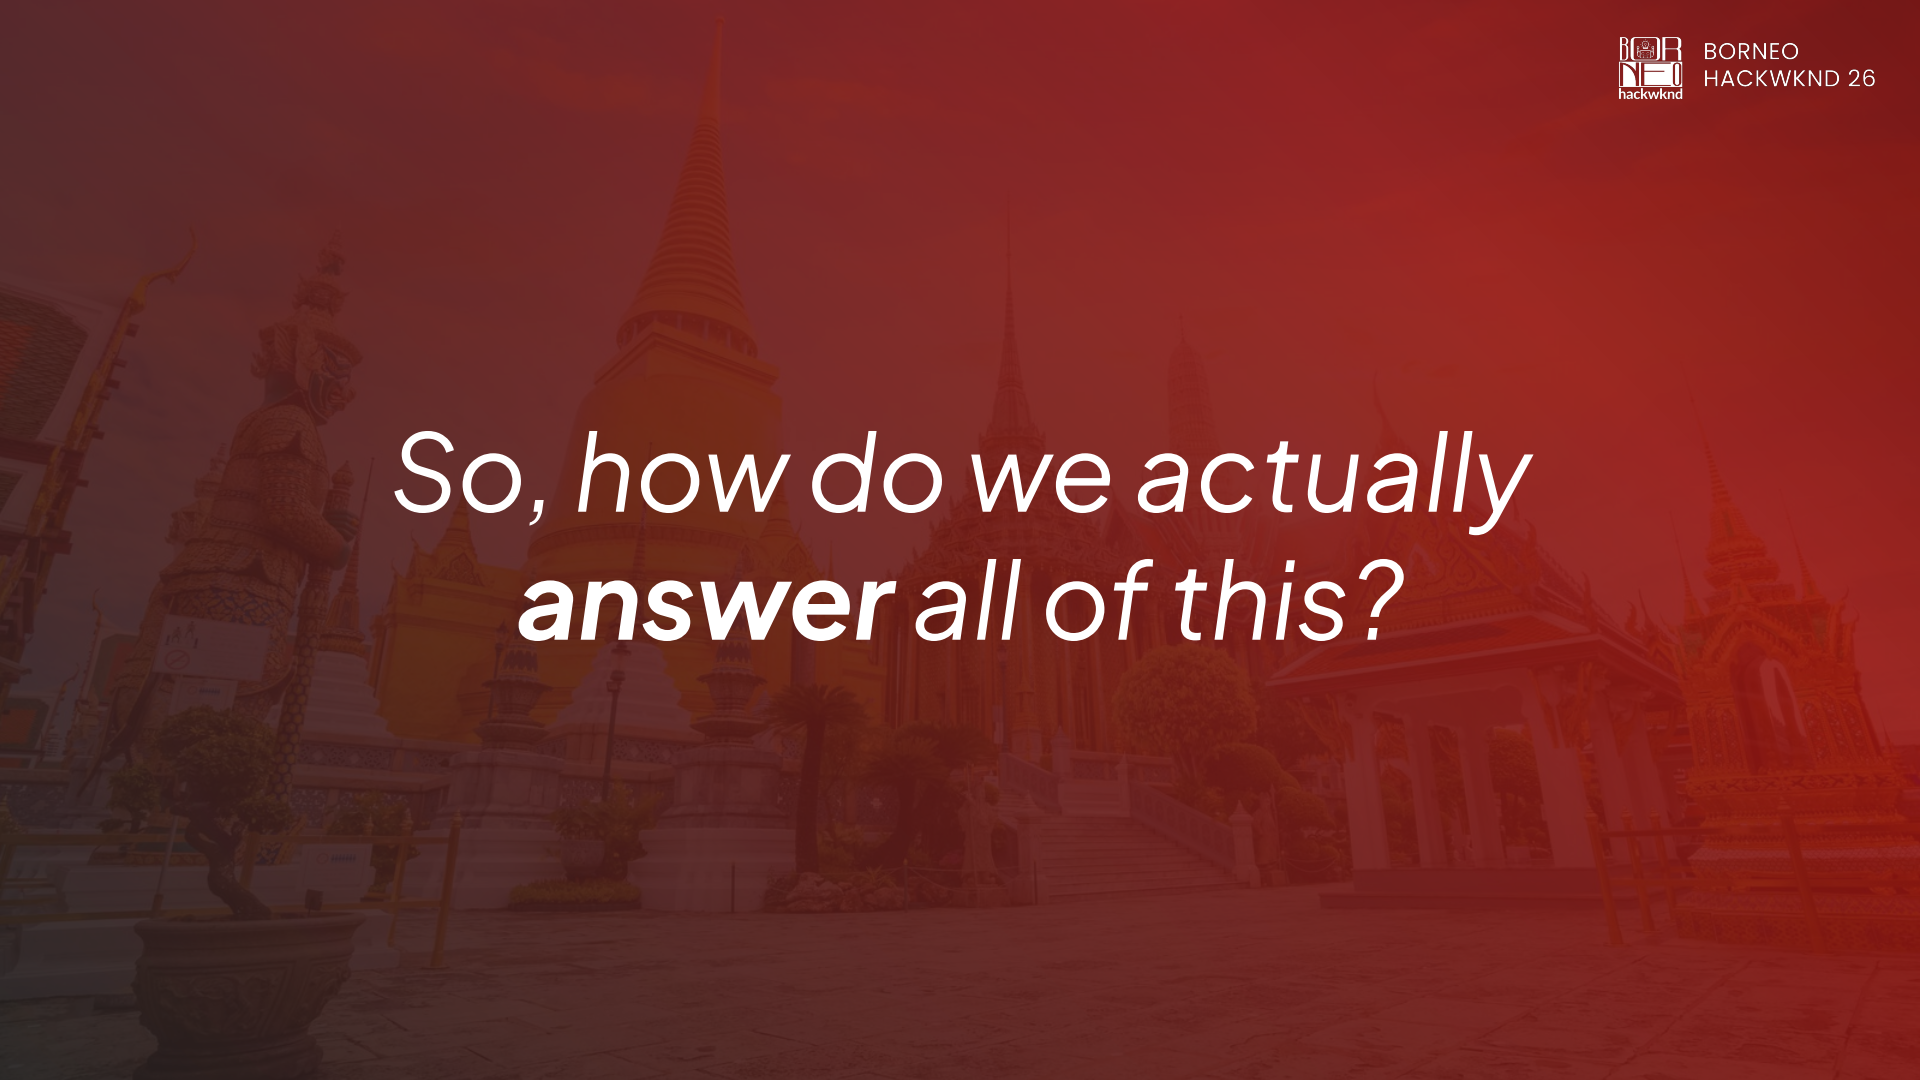

Key Insights

Youth are shifting to
**dominant
languages**, unaware
of what's fading

User Persona and Journey

The background is a photograph of a traditional Southeast Asian temple complex, possibly in Bali or Indonesia. It features a large, ornate statue of a deity on the left, a central temple with a tall, tiered spire, and other smaller structures with similar architectural styles. The entire image is overlaid with a semi-transparent red filter.

So, how do we actually
answer all of this?

We present you...

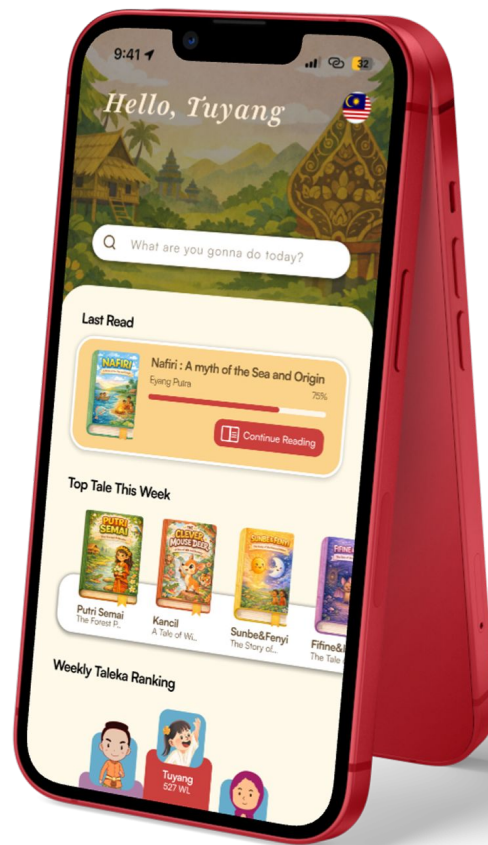

Taleka

Taleka as A Platform Designed for Every Endangered Language Community

Every **story** keeps a language **alive**

Projected Impact

Short Term

Indigenous language gets its **first digital home**, with elders recording and youth learning from day one.

Mid Term

10,000+ active users, B2G partnerships live, and the platform reaches financial sustainability.

Long Term

Taleka becomes the **blueprint** for reviving all 1,200+ endangered languages across Southeast Asia.

Competitive Advantages

The architecture and methodology can be replicated for **any endangered** language

Preserves **AND** teaches an indigenous language simultaneously. No competitor touches this.

The knowledge stays **authentic** and culturally **accurate**, not filtered through outside researchers.

Appendix

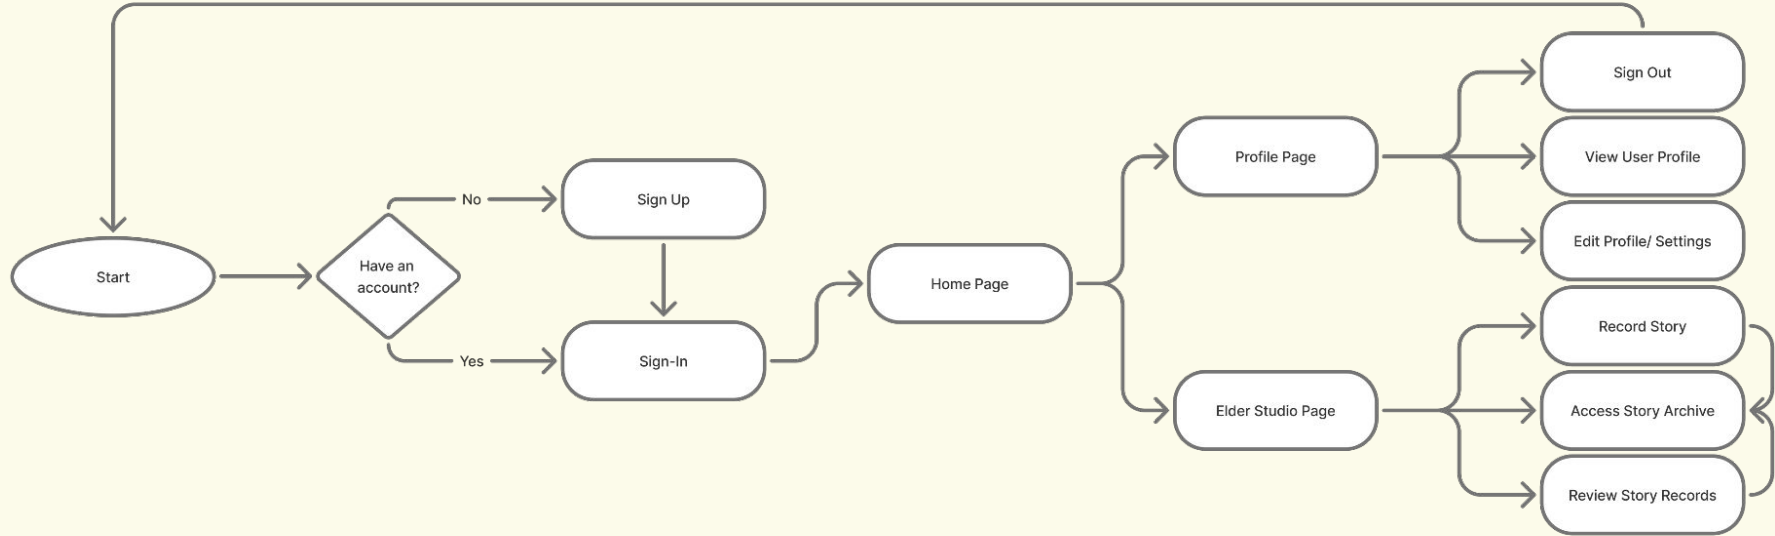

Appendix 1. Technology Stack

Appendix 2. Learner's User Flow

Appendix 3. Elder's User Flow

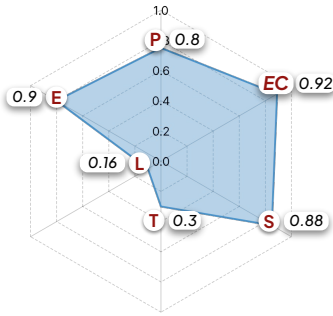

Appendix 4. PESTLE and Gap Analysis

We analyzed Taleka's **external forces** shaping its opportunity...

Existing solutions preserve the language, but **fail** to bring it to life for the people who need it most.

PESTLE

Edtech investment is **growing**

Sustainability push **digital-first** platforms

Government & NGO actively supports

Gen Z wants **gamified**, culturally meaningful learning

In-Depth Gap Analysis

Existing

Static archives format

Users are researchers

Coverage only for documentation

Low engagement

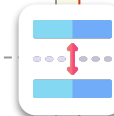

What's *needed*

Interactive & gamified

Users are youth & elders

To learn and preserve

Daily habit activation

Key Insight

No platform exists that both preserves and teaches an indigenous language

Competitive Landscape

World's most popular **language learning app**

Only support **high resources** language

Academic-led initiatives

Valuable for researchers

Completely **inaccessible** to everyday users

Static Archives

Appendix 5. Customer Persona and TAM SAM SOM

Segments

Heritage Seeker

B2C

Cultural Learner

B2C

Customer Persona

Aware but can't speak

Lina, 21

University Student,
Orang Asli descendant

"My dearest grandmother speaks Semai but I never learned it. I want to reconnect before it's too late."

Atin, 37

Company Employee,
grew up in Kuching

"I was born and raised in Malaysia and I had no idea Semai even existed. That kind of surprised me..., this is my own country!"

Pain Points

Disconnected from elders and Semai speaking family members who hold the language and culture

No accessible digital platform to learn Semai as existing apps don't support it

Unaware Semai even exists because indigenous languages are invisible in mainstream media and education

No cultural context provided, so hard to understand why learning Semai matters

Priority

Reconnect with family heritage and preserve ancestral identity through language

Engage with indigenous Malaysian culture in a meaningful, low-barrier way

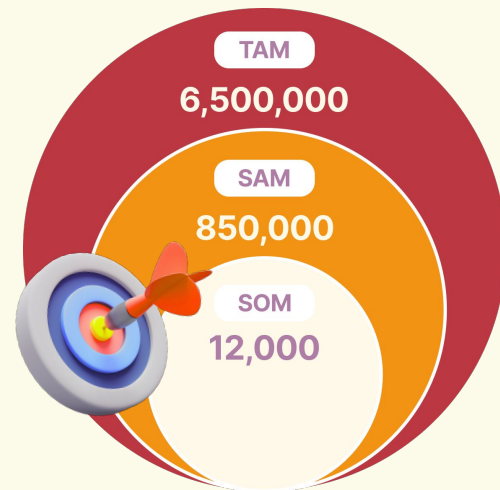

Market Size

~200,000+

Orang Asli community & diaspora reachable via community and NGO networks

~650,000

Culturally engaged Malaysian students, educators & researchers reachable via digital channels

TAM-6.5M

Malaysians aged 15-40 on digital learning platforms with interest in cultural or heritage content.

SAM-850K

Orang Asli community & diaspora, culturally engaged students, educators, NGO workers

SOM-12K

A conservative 1.4% of SAM consist of community networks, NGO referrals, and motivated adopters

LICENSE AGREEMENT FOR RESTRICTED USE OF LINGUISTIC DATA

Project: Borneo HACKWKND 2026

Linguistic Resource: Semai Dictionary (© 2021 Language Development SIL Global)

Date: April 24, 2026

1. PARTIES

This Agreement is made between:

- **LICENSOR:** SIL Global (hereinafter "SIL")
- **LICENSEE:** Arqila Surya Putra, representing the **AyoKeMaIAI Team** (hereinafter "Licensee")

2. GRANT OF LICENSE

SIL hereby grants Licensee a non-exclusive, non-transferable, and revocable license to use lexical data from the **Semai Dictionary** (including word entries, Malay/English glosses, and example sentences) specifically for the development and demonstration of an application for the **Borneo HACKWKND 2026** competition.

3. STIPULATIONS AND CONDITIONS

5. TERMINATION

SIL reserves the right to revoke this permission at any time via written notice if the terms of this Agreement are breached.

6. SIGNATURES

By using the data, the Licensee agrees to the terms set forth above.

For SIL Global:

Date: 1 May 2026

Appendix 11. The Use of AI for The Project

Platform	Explanation
	GitHub Copilot was used to assist with coding during the development of the application. The tool provided code suggestions and helped with debugging and implementing certain programming functions. It served as a supportive tool to improve development efficiency.
	Nano Banana was used to generate several visual image assets used within the application interface. These assets were incorporated into the design to support the visual storytelling and learning experience of the application.
	ChatGPT was used to assist in generating certain image assets and providing general guidance during the development process. It also helped refine content descriptions and support ideation for the project.
	Greptile was used as an automated code reviewer to help maintain high code quality during development. The tool analyzed pull requests to identify potential bugs, enforce coding standards, and suggest improvements. It served as a safeguard to ensure the codebase remained clean, efficient, and reliable.
	Claude was used to assist with coding and problem-solving during the development process. The tool helped generate code suggestions, explain technical concepts, and support implementation of application features to improve development productivity.

Appendix 12. UI/UX Refinement Changelog

Previous

Home Page

Homepage for both learner and elder was no different when for changing country to learn indigenous language across ASEAN

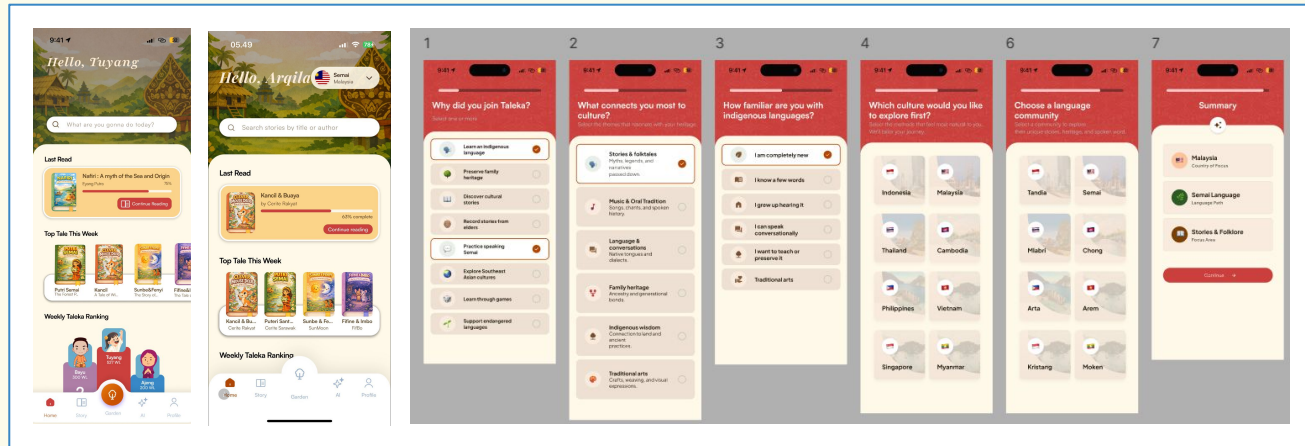

On-boarding

No Onboarding flow

What have changed

Homepage for learner and elder has changed aligned with the indigenous language and country

Added onboarding flow to personalize the learning journey, match users with the right indigenous language, and segment user types

Appendix 13. Code Refinement Changelog

Previous

Story Pipeline

Elder recordings were only stored as **static audio archives** without story publishing capabilities.

Multi Support

The platform had **limited personalization** with static visuals and minimal language options.

AI Coach

The AI Coach relied solely on Gemini and **could not retain conversations** between sessions.

Profile Onboarding

Users entered the app **without guided setup** or personalized preferences.

Long Term

The project primarily focused on **delivering a functional MVP** for the initial submission.

What have changed

Verified recordings can now be **transformed into AI-enhanced interactive stories** with autogenerated visuals and subtitles.

Taleka now supports **adaptive UI personalization** for 8 indigenous ASEAN languages as a foundation for future development.

Taleka now uses **Claude Agent SDK** as the primary provider with persistent memory.

A **new onboarding flow** now personalizes role, language, identity, and app experience from the first session.

Taleka has evolved into a more **scalable, personalized, and production-ready** cultural preservation platform.
